Re: Humitech Humidity Control System

To: Management,

Humitech Systems (filters) were installed in our chiller on trial basis.
2am pleased to report that we have encountered and observed that:-

- Odours was reduced considerably
- Moisture reduced (floors dryer)
- Vegetables last longer (no shrinkage)
- Meat too last longer (no odours)

We have also encountered less wastage as food last longer than normal.

Humitech will change the filters bags every 2 weeks as required. We strongly recommend this product in every chiller in Singapore.
